Howell Brothers

Only Coffee Roasters in Bryan

Fire INSURANCE Plate Glass. Accident Bonds

Vacation time is here and the usual crop of summer accidents will follow. I can protect you for my companies issue most any kind of policy you possibly could think of—attractive, liberal and inexpensive. For those who do not care for a regular accident policy, I can issue accident tickets from one day to thirty days. These often come in handy for little outing trips.

I can also insure your blooded livestock at reasonable rates. My company is regularly incorporated with paid-in capital stock.

In fact I can insure anything insurable. Your business will receive prompt attention and be appreciated.

PLUNGED INTO WATER

Bridge Collapsed as a Rock Island
Train Went on It.

LANDS IN THE RIVER

One Man Is Known to Have Lost
His Life, and It Is Possible
Others Drowned in
the Coaches.

Kingfisher, Okla., Sept. 19.—While it is believed that several lives were lost Sunday when several cars of Rock Island train No. 12, northbound, went into the Cimarron river at Dover, Okla., no bodies have been recovered and the only person on the train positively known to have perished is "Hank" Littlefield, an employee of the Forepaugh-Sells circus, who was drowned. The missing are:

Mrs. Robinson, Enid, Okla., bruised badly.

George L. Wright, Denver, badly bruised, head cut.

C. W. Brown, Comanche, I. T., arm wrenched.

Mrs. C. E. Hushler, Dallas, back slightly injured.

David Lang, Hillsboro, Tex., cut on head, back and arms.

C. W. Bacon, Enid, Okla., arm dislocated.

Three-year-old child of Mrs. Kate Sells, Payne, O., strangled from water; cannot live.

Simon W. Byron, fireman, shoulder dislocated; cut on head and neck.

Engineer lies, cut on head.

W. H. Spitzer, Enid, arm sprained and fingers cut.

The locomotive disappeared from sight almost immediately. The mail and baggage clerks escaped from their coaches and swam to the shore.

The accident was due to the defective condition of the bridge, which was swayed out of line by the pressure of driftwood carried down by the swollen stream. The train was an hour late, and was running at a high rate of speed to make up time.

The engine driver did not see the condition of the bridge until he was within a few yards, when it was too late to stop. He shouted to his fireman, threw on the air brakes and jumped.

He landed on the very verge of the river bank and escaped unhurt. The fireman was less fortunate, and sustained severe injuries.

When the engine struck the bridge the whole structure suddenly collapsed, precipitating the engine, smoker and day coaches into the water. The two heavy Pullman cars remained on the track.

The current whirled the day coach down stream and lodged it against a sand bank. The occupants were helped out through the doors and windows. The smoking car floated down stream submerged all but the very top. It struck on a sandbar in the middle of the river, and four men were seen to clamber through the windows and pull themselves on top of the car, calling loudly for help, but those on shore were unable to reach them on account of high water. While they were begging assistance a large bunch of driftwood swept down and carried them from their fragile footing.

Three other men jumped through the rear door of the smoker before it sank, and struck out for shore. They were carried down the current for perhaps a quarter of a mile, when they were pulled out. They were almost exhausted from strangulation and exposure.

The most authentic accounts place the number of passengers in the smoker at between twenty-five and thirty. With few exceptions they have not been accounted for. The only hopeful news is contained in messages received from rural districts. Men on bits of driftwood have been seen going down stream at various points, but attempts at rescue have in most instances proved futile.

One man whose name is not known was fished out in the Cimarron at Cashion, twenty miles from the scene of the wreck. He was almost dead.

Those who were injured and taken from the river at the bridge were hurried to Kingfisher. The people of Kingfisher have thrown open their homes for the succor of the injured.

The derailed cars are lying near the bank of the river. A party of searchers worked with torches and lanterns to lend aid to any within the coaches or recover the bodies.

Sheriff J. P. Love of Kingfisher, who was in the smoker of the wrecked train, experienced a marvelous escape. he said: "Just as the car was turning on its side I fought my way to the rear and forced my body through the door. The water then was over my head. When I came to the surface I was swept down stream by the heavy current. Just as I had given up all hope, and was in the last stages of exhaustion, I touched bottom and drew myself upon the bank. There were at least thirty others in the smoker. I saw two besides myself escape."

Governor Frantz ordered out the engineer corps of the Oklahoma National guard, in encampment here, to build a bridge over the Cimarron river three miles north of Guthrie.

The Cimarron river fell nearly five feet Tuesday night. A negro porter is believed to have been drowned. All the passengers except Hank Littlefield, the circus man, have been accounted for.

THOUSAND LIVES LOST

Typhoon at Hongkong and Vicinity
Truly Awful.

SHIPPING SUFFERED

On One Chinese Craft Alone, Which
Capsized, There Were One Hun-
dred and Thirty Souls, All
of Them Drowning.

Manila, Sept. 19.—Advices up to noon Wednesday stated that during the typhoon in Hongkong harbor and vicinity Tuesday 1,000 lives were lost, public and private property valued at millions of dollars was damaged, twelve ships sunk, twenty-four stranded, seven damaged and half the native craft in port sent to the bottom. The shipping trade has been paralyzed through lack of lighters.

The typhoon came without warning. The observatory predicted moderate winds. Half an hour after a gun signal had been fired the storm was at its height. It lasted two hours.

Most of the damage done was wrought on Kowloon peninsula. Over 1,000 sampans and junks are missing from Hongkong alone. The wharves were swept and houses collapsed. The military barracks are in ruins.

The harbor is strewn with wreckage thrown on shore. Hundreds of Chinese boatmen and families were saved by the bravery of the police and civilians, but several thousand Chinese water dwellers must have perished, many within a short distance of the shore.

Losses in lives and property among Chinese are appalling. The police stations in Hongkong are surrounded by Chinese identifying their dead. Families of Hongkong boatmen live night and day on sampans and thousands of these people are homeless. One launch that capsized had 130 Chinese on board. They all were drowned.

The bishop of Victoria, Dr. Hoare, was on his way to visit some neighboring islands when the storm broke. He is reported missing. His launch has been found floating bottom upward.

Many valuable steel lighters have been lost. Some of them were hurled ashore. Channels have to be dug to permit some vessels ashore to be refloated. The force of the wind and waves was such that some vessels were stranded almost high and dry.

The Japanese steamer Sada Maru rescued sixty-six natives and one English pilot as he was approaching Hongkong.

Sir Matthew Nathan, governor of Hongkong, and the authorities are doing everything possible to render assistance.

Reports of fresh disasters are arriving every hour. Only a few Europeans are missing. No reports are on hand to show how the fishing fleets and ships outside the harbor fared.

Public opinion is incensed at the observatory for not reporting the approach of the typhoon. An inquiry has been demanded.

TAFT PARTY ARRIVES.

Proceeded at Once to the Palace to Confer With President Palma.

Havana, Sept. 19.—The American cruiser Des Moines, with Secretary of War Taft and Assistant Secretary of State Bacon on board, arrived here at 7:30 o'clock Wednesday. Messrs. Taft and Bacon were received by Senor O'Farrell, Cuban secretary of state, on board. Messrs. Taft and Bacon came ashore and proceeded to the palace, where they met President Palma at 10 o'clock.

A fairly large crowd assembled at Cabelles wharf to witness the landing, but there was no demonstration of any sort as the launch carrying the guests whose visit is considered so momentous to Cuba's future swept around the cruiser Denver, which is still moored in front of this wharf. The Denver's sailors were drawn up and presented arms and the cruiser fired a salute as the secretary of war stepped ashore. The secretary at once faced a score of clicking cameras. Then the mayor and councilmen of Havana advanced and delivered a formal welcome, to which Mr. Taft responded briefly. The party thereupon entered automobiles and were driven to the palace. Here they were conducted upstairs into the main salon.

FEUDISTS FIGHT.

Second Engagement Resulted in One Death and Another Dying.

Sergeant, Ky., Sept. 19.—In the second engagement between members of the Mullins-Fleming families on Letcher and Pike county border James Anderson, aged thirty-two, a member of the Mullins faction, was killed, and Hiram Mullins, leader of the faction, mortally wounded. Another member of the Mullins party, whose name cannot be learned, was shot, but it is not known how seriously. John Fleming of the Fleming faction was shot in the left limb near the knee, inflicting a flesh wound. The battle occurred one mile from Long Fork settlement. Forty shots are said to have been fired. It is now thought the Mullins-Fleming feud will soon be a thing of the past and the Mullins crowd may disband.

REBELS ATTACKED.

Lost Only One Man Killed, While Government Had Eighteen Killed. Havana, Sept. 19.—Alfredo Zayas, president of the Liberal party, informs the Associated Press that Colonel Avalos, with 200 mounted men, attacked a rebel force under Pino Guerra near Los Palacios in Pinar de Rio province. The rebels had one man killed and two wounded. The government soldiers had eighteen killed and thirty wounded. A second attack was about to begin when Guerra's brother, in the capacity of peacemaker, arrived from Havana and urged an armistice, which was speedily granted. The government has no news of this engagement.

WRECK ON FRISCO.

Engineer Palmer Is Dead and Also Fireman Kunz. Guthrie, Sept. 19.—A northbound St. Louis and San Francisco railway freight train went through a bridge on the South Canadian river near Carleton, Okla., Tuesday morning. The engineer, Paul Palmer, is dead, and brakeman Priest is missing. The body of Fireman Kunz of Blackwell, Okla., is pinned under the engine which, with four cars, is in the rapidly rising stream. People near the scene of the wreck report that a man's body can be seen on a small island near the bridge.

ASSAULTED BY NEGRO.

Scoundrel Failed in His Diabolical Intention and Escaped. Baton Rouge, Sept. 19.—As Mrs. Frank L. Howell was preparing to retire Tuesday night she heard a noise in the bathroom and went to investigate. There was found a negro who tried to pull her into the room, but she fought desperately. She was badly used, and her night robe was torn from her. Her little son screamed for help, and as soon as the news of the attempted assault was known on the streets a local company of militia was called out and the whole square surrounded. The negro escaped. A new razor was found in the bathroom.

FIFTY-ONE DROWN.

Several Towns in Mexico Also Have Been Destroyed. El Paso, Sept. 19.—A Herald dispatch from Guadalajara states that the correspondent of the Jalisco Times at Mazatlan has wired his paper as follows: "Fifty-one persons were drowned in the recent floods in Santiago, Ixcuintka and the adjacent districts in the territory of Tepic. The bodies, it is stated, were taken from the river. It is reported that 500 people are homeless. Widespread damage has resulted from the inundation of Sinaloa. Several river towns have been partially destroyed and crops in many sections ruined."

TROLLEY LINE PROGRESS.

Indications Strong that the Required Stock Subscription will be Completed Today.

The trolley line committee made substantial gains yesterday, and the indications are strong that the soliciting will be concluded today, leaving only the details of the contract to be closed upon the return of Mr. Kennedy to Texas. The date of this transaction is going to be a red letter day in the history of Bryan, and every man who has a part in landing the enterprise will have reason to feel proud of his efforts. Bryan is about to realize the sensation of success in her efforts to land the trolley proposition. They were offered another deal which required the raising of \$15,000, and yesterday the committee only needed some three thousand dollars to complete the required amount. It don't seem to take the citizens of Bryan very long to grasp an opening.—Navasota Examiner.

PATHETIC CASE.

Little Girl Survived For a Time Then Succumbed to Malady. Sherman, Sept. 19.—A pathetic case of suspended animation, believed to be death, followed by joy at seeing the loved one revive and apparently gain strength, to collapse again and die within a few hours occurred at the home of Mr. and Mrs. Mark Carothers, North Maxey street, Tuesday morning. The patient was a bright little girl and the malady was diphtheria.

ELECT OFFICERS.

E. S. Conway of Chicago Is Chosen Grand Sire. Toronto, Sept. 19.—The sovereign grand lodge of Odd Fellows elected the following officers: Grand Sire—E. S. Conway, Chicago. Deputy Grand Sire—John L. Nolen, Nashville.

SCIENCE AND INVENTION.

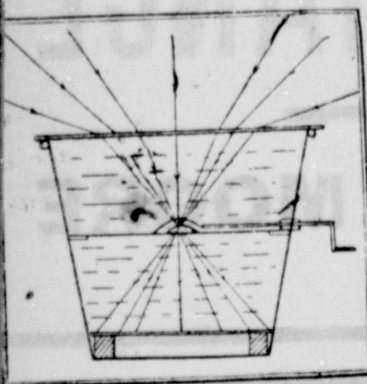

THE FISHES SEE US.

Some interesting experiments in the photography, by means of a submersible camera, of objects above the surface of a sheet of water, are described by Prof. R. W. Wood in the *Scientific American*.

Prof. Wood says that his object was to ascertain how the outer world would appear to a fish. He writes:

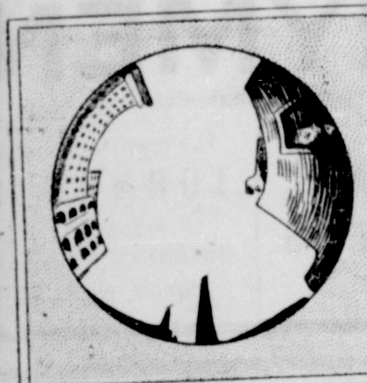

"In discussing the peculiar type of action which occurs when light enters the surface of water, it seems of interest to ascertain how the external world appears to the fish. As is well known, below the surface of the water the sky is compressed into a comparatively small circle of light, the center of which is always immediately above the observer, the appearance being as if the pond were covered by an opaque roof with a circular aperture or window cut in it. The objects surrounding the pond, such as houses or fishermen, must appear around the rim of the circle of light, but we are unable to get a clear notion of their appearance, since our eyes are not adapted to distinct vision under water. It occurred to me that a very good notion of how these

things appear to the fish could be obtained by immersing a camera in water and photographing the circle of light, for it is easy enough to arrange a lens and so as to obtain a sharp image when both are immersed in water. The apparatus was constructed out of a lard-pail, a short-focus lens provided with a very smallaphragm being cemented over a hole perforated in a metal disk which rested on a rim soldered around the inside of the pail. The plate was placed on the bottom of the pail and the whole filled with clean water in a dark room. The lens was covered by a metal cap, operated by a handle on the outside of the pail. The apparatus was set on the ground, and the surface of the water covered with a sheet of glass to prevent ripples, the pail being so full that the glass was in contact with the water. This arrangement obviated the necessity of immersing the affair in a pond, since the function of the latter was performed by the water in the pail above the lens. A diagram of the arrangement is shown in Fig. 1, together with the paths of the incident and refracted rays. A number of extremely inter-

DEVICE FOR TAKING "FISH EYE VIEWS."

esting pictures were obtained with the device, which proved to be the equivalent of a lens having a working angle of 180 degrees. There was of course a good deal of distortion near the circumference of the circular picture. Fig. 2 shows Mt. Vernon place as it would appear to a fish submerged in a pond near the base of the lion."

A "FISH EYE VIEW."

est pictures were obtained with the device, which proved to be the equivalent of a lens having a working angle of 180 degrees. There was of course a good deal of distortion near the circumference of the circular picture. Fig. 2 shows Mt. Vernon place as it would appear to a fish submerged in a pond near the base of the lion."

Self-Igniting Mantle.

Platinum sponge becomes incandescent on contact with gas and causes its ignition. This phenomenon has been given during the flame direct. MM. Rouxville and Michaud have patented in France a process in which the addition of any foreign apparatus to the mantle is avoided. They have recourse simply to a mixture in which platinum sponge is the essential ingredient, composed of refractory and adhering substances. Impregnated with this mixture in its upper texture, the mantle has the power of igniting the gas, and of thus becoming incandescent. The stem may also be covered with the composition, and the same result secured.

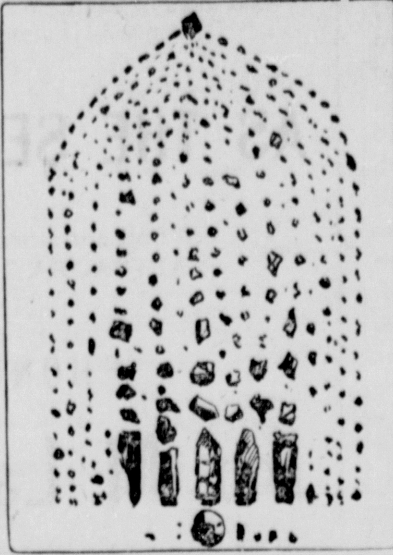

Egyptian Borrowers.

The Egyptians had a very remarkable ordinance to prevent persons from borrowing imprudently. An Egyptian was not permitted to borrow without giving to his creditors in pledge the body of his father. It was deemed both an impiety and an infamy not to redeem so sacred a pledge. A person who died without fulfilling that duty was deprived of the usual honors paid to the dead.

RESULTS OF SMALL FIRE.

Terribly Destructive Power of One of the Modern Missiles of Warfare.

The accompanying picture, which is from the Journal of the United States Artillery, shows in a vivid way the probable results of the bursting of a single shell, by depicting an assemblage of the fragments made in an actual proving ground test, which were gathered together and photographed.

FRAGMENTS OF BURSTED SHELL.

Says Popular Mechanics, commenting upon the picture:

"The average citizen who is accustomed to reading of shells and other munitions of war rarely has the faintest conception of the fearfully devastating effect that results when a shell explodes."

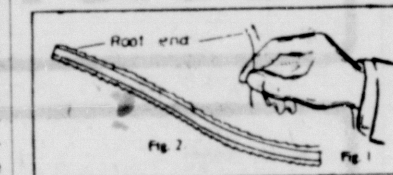

"The shell, which was known as a six-inch A. P. shell, originally weighed 102 1/2 pounds; the recovered fragments aggregated 94 3-15 pounds, of which the largest piece weighed 10 1/4 pounds. The average weight of the pieces was 2 5-16 ounces. The shell, which was loaded with black powder, on being fired from the gun passed through six inches of hard-faced Krupp plate, and burst when about eight feet beyond. Arrangements had previously been made for the recovery of as large a number of fragments as possible.

"When the count was made there were almost 650 pieces. Had the projectile burst in a group of men, the fatal results can easily be imagined."

HAIRS HAVE TEETH.

A Curious Fact Which Only the Microscope and Careful Testing Will Reveal.

A person who does not know how a hair looks when magnified, would be very much surprised to know it is possible to tell which was the root end of a hair that had been broken or cut. This may be easily done by holding the hair between the thumb and finger, as shown in Fig. 1, and moving the thumb up and down. The hair will

THE TEETH OF THE HAIR.

then move in the direction of the root end.

A glance at the magnified hair, Fig. 2, will show the cause of this motion. The teeth along the sides of the hair act like ratchet teeth and allow it to move only in one direction. It is on account of the teeth, says Popular Mechanics, that the horse hairs used in the manufacture of violin bows are not all laid in one direction. Half of them are turned end for end so that the bow will produce the same volume of sound on the up and down strokes.

Steam Without Fire.

A new type of boiler that is able to keep on supplying steam for several hours after the fire has been extinguished has been devised by Mr. Maurice, engineer-in-chief of the French navy, and is attracting considerable attention, being operated upon a novel and original plan. This invention, which was awarded a prize at the end of the last year by the Academie des Sciences, is thus described in the *Scientific American* Supplement:

"The principle of the storage of heat consists in the use of a mixture of salts having great specific heat and surrounding the greater part of the tubular system of the boiler. The temperature of these salts rises to about 450 degrees C. (841 degrees F.) during the heat. The result forms a new solution of the problem which was formerly solved by the use of reservoirs of superheated water, and here we have an economy of weight as well as space. After the heat which has accumulated during the run after the fire is extinguished, the accumulation of the heat is again made very quickly after the fire is started. The system is of special value in the marine, and also in electric stations. The result of the first experiments which have been made at Cherbourg are quite favorable, and no doubt the system will be applied afterward on a larger scale."

Velocity of Underground Water.

The highest recorded velocity of underground water is said to be 144 feet in 24 hours. The new record is for water flowing through gravel near Tucson, Ariz. The observations were made during the last Christmas holidays by Mr. H. C. Wolf, of the department of mathematics of the University of Wisconsin.

LURE OF LOST TREASURE

MANY HUNTS IN PROGRESS

In all the world nothing stirs the blood or excites the imagination so much as a search for hidden treasure. In fiction or in fact nothing is so entrancing.

At present several interesting treasure hunts are under way. In the little bay of Tobermory, on the west coast of Scotland, a syndicate is endeavoring to reach the strong box of a sunken ship of the Spanish armada which plunged beneath those waters with wealth estimated at \$15,000,000.

Efforts are being made to raise a British warship which was sunk in Balaklava bay during the Crimean war. Those at the head of this enterprise expect to reap a golden harvest of \$3,000,000. In prosy England the marshes of the Wash are being explored for the royal jewels and treasure of King John, which were lost by him during his flight in 1216. Into almost every clime and to thrilling adventures the golden ignis fatuus of hidden treasure is luring men. Soldiers of fortune never weave more romantic or dramatic stories than those of the present searches for buried gold.

Seek Armada Treasure Ship.

At present a golden thread of romantic interest is being spun like a shimmering spider web over Tobermory bay, one of the loveliest inlets on the west coast of Scotland. This bay offers shelter to mariners and fishermen off the northwest corner of the Isle of Mull.

At that point a determined search is on for treasure, which, it is believed, has lain quietly under the water for more than three centuries.

A halo of romance and tradition surrounds the gold which is supposed to have gone down with the Admiral of Florence, or Florentia, the treasure ship of the Spanish armada, in 1588.

Legend has it that in September of that year a large Spanish galleon, the Florentia, in trying to avoid the storms and save the treasure on board until suitable weather made possible her escape southward, took refuge in the safe, land-locked bay of Tobermory.

According to reports, the Florentia had on board \$15,000,000 in English money. The officers and men, who were starving, demanded food from the McLeans of Mull.

In return for supplies, after due negotiation, the admiral agreed to lead 100 men to assist the McLean clan of Scotland, which at that time was at sword's points with the McDonalds. He was also to pay the McLeans a large sum of money as well if they would assist him to repair his ship.

This promise of money is taken to show the presence of a considerable quantity of specie on board and as the vessel was a flagship it is probable that she carried the treasure of the entire Armada.

The 100 men were landed and assisted in defeating the McDonalds. They were afterward allowed to return to the ship, but the McLeans held three officers as hostages until the debt be paid.

Kept Chieftain a Prisoner.

They also sent one of their chieftains, Donald Glas McLean, on board the vessel to collect the price agreed upon, but the Spanish admiral disarmed him and kept him a prisoner.

During the night, so the story goes, McLean discovered the position of the powder magazine. The next morning as the ship was getting under way the chieftain was brought on deck to take a last look at his native land. Breaking away from his captors, he rushed below and blew up the ship, perishing with most of the crew.

Since then a number of endeavors have been made to recover the treasure. In 1641 and again in 1655 the dukes of Argyle attempted salvage operations, but without success. In 1730

a diving bell was employed.

At that time a fine bronze cannon was recovered, with many gold and silver coins. Since then other guns and relics have been brought to the surface, but the strongroom supposed to contain the treasure has never been reached.

Among the articles already recovered are sword blades and scabbards, pistols, large and small; a peculiar taper-necked bottle of crude workmanship and bones of drowned Spaniards. The sword blades and scabbards were heavily incrustated with lime and the bottle covered with crustacea.

One of the early divers found that the deck of the vessel from the mizzen mast forward was blown away and that cannon and other contents of the ship were scattered about for a distance of 20 yards. The poop from the mainmast aft, however, was intact. Here, it is believed, the treasure room is located.

Since then the vessel has settled considerably and a formation of sand and mud now covers it. To get through this wrecking crew is working under direction of Capt. William Burns, who has had considerable experience in salvage work.

Sand pumps are being used and the divers work by the aid of a 2,000-candle power electric light. They have brought up candlesticks, flags, copper pans, coins, a gold ring and a number of metal and stone cannon balls.

On Island of Mauritius.

For some months an army of laborers has been digging on the island of Mauritius, in the Indian ocean, searching for a treasure valued at \$100,000,000 or more, supposed to have been buried at the time of the British conquest or some time before, by the French officials. This expedition is being directed by a company formed for the purpose of unearthing the treasure.

England is excited just now over an attempt to recover the royal jewels and treasure lost by King John in the Wash, when he fled across the marshes in 1216.

In preparation for the search St. John Hope, assistant secretary of the Society of Antiquarians, has made a study of the tides and land shiftings from the time King John lost his baggage and his wealth until the present. The Wash has changed in its course since 1216 and Mr. Hope calculates that the treasure wagons will be located at Sutton bridge, where there is 23 feet of silt.

Another search for wealth long hidden beneath the waters is being conducted at Sebastopol, in the Crimea. Armed with government authority, salvage experts have undertaken to raise from the bottom of Balaklava bay a large British man-of-war sunk by Russian gunfire directed against the British, French and Turkish opponents of the czar.

It is stated that members of the Russian admiralty possess trustworthy information to the effect that the sunken man-of-war contains a large sum of money originally destined for the payment of the British forces. The present attempt is progressing under the supervision of a well-known specialist in salvage, Sig. Restucci, an Italian.

Knows of Pirate's Hoard.

A few weeks ago a Boston woman, who signed the name "Sadie J. Mason" at the bottom of a newspaper advertisement for backers for her enterprise, asserted that she had learned the hiding place of millions of treasure which was captured by the crew of a ship that flew the "Jolly Roger" for a number of successful years and was finally burned, three-quarters of a century ago, on an island in the St. Lawrence gulf.

Miss Mason asserted that in the

spot of which she had learned there were millions in gold, silver and jewels, waiting only to be taken away. At last accounts this vast treasure trove had not been unearthed.

Familiar to every newspaper reader of recent years is the story of the famous Cocos island treasure. During the last 70 years no fewer than 18 expeditions have set out to recover this pile of gold and jewels. Indeed, more than once parties have engaged in deadly conflict. Search is in progress there at the present time.

Cocos island is a patch of land, 16 square miles in extent, rising from the Pacific ocean off the coast of Costa Rica, to which country it belongs. Two treasure "plants" are supposed to be located there, one of \$60,000,000 and the other of \$15,000,000.

The first is called the Bonita treasure, after the notorious pirate of that name. For many years Bonita flew the black flag and cross bones in the Caribbean sea and accumulated great stores of plunder.

Wealth Buried by Bonita.

In 1821, after the surrender of Donaja to the Liberator Iturbide, vast stores of government wealth were removed from the City of Mexico. Bonita, it is stated, managed to capture the treasure and hurried with his spoil to Cocos island, where he buried it.

The other "plant," called the Mary Dier treasure, was committed to the keeping of Cocos island by the crew of the ship of that name, which happened to be in the harbor of Callao, Peru, during a war upheaval.

All the treasures and plate of the cathedral and of the churches of Lima and the surrounding country were hurried to the Scotch ship Mary Dier. In addition many wealthy citizens placed their choicest possessions on the vessel. In all it is stated that the ship's unexpected cargo amounted in value to over \$15,000,000.

This proved too much, tradition states, for the officers and crew. The guardians of the wealth were overpowered and the treasure was landed and buried on Cocos island until such time as it could be recovered and used.

Many Parties Hunt Treasure.

At present the island is guarded by Capt. Matthews, its governor and part owner. He is directing the search. Harold Gray, of Ireland, claims the concession to hunt the treasure, but the claim is combated by others. An armed expedition under Lord Fitzwilliams of England had a brush with the Gray forces last year and the Costa Rican government was compelled to send a gunboat to restore order. As far as known the Cocos island treasure remains undiscovered.

Most treasure hunts are being conducted by companies which provide capital as a speculation. Now and then, however, the story comes to light of some gold-dazzled individual who sinks all his possessions in chasing the golden will-o'-the-wisp.

One such man—William S. Meade—died recently, penniless and alone in New York. Early in life he made a fortune through an invention, but spent it all chasing the ignis fatuus of hidden treasure.

Meade asserted he had fallen heir to maps and directions that would lead to buried wealth that would run up into the millions. He purchased a large and expensive steam yacht, manned it with a large crew and machinery for raising sunken galleons supposed to be full of Spanish gold and soon after the civil war set sail for the south seas.

Disaster, wreck and privation fell to the lot of the first cruise and Meade and his companions were forced to return without a single find. More money was sunk in fitting out another expedition, but this, too, was a failure that ended in a shipwreck.

CARRIED LETTERS FREE.

Postal Record Broken After the Disaster at San Francisco.

New York.—One thing about the San Francisco earthquake and fire which interests government employees is the fact that for the first time since the civil war Uncle Sam disregarded entirely the post office regulations.

On the morning of the earthquake and for several days afterward people wrote letters and mailed them wherever they could, and the post office employees, who stuck to it right through, collected them and sent them ahead without postage. Letters were written in pencil on scraps of paper, cuffs, collars and bits of gloves, but all went.

There is a regulation of the post office department that any soldier or sailor in active government service may have a letter franked through without postage by his officers and it will be delivered, but the recipient must pay the postage upon delivery at the regular rate.

In the civil war there was considerable confusion in the matter of franks. Sometimes the recipient paid, and sometimes a missive marked "Soldier's Letter" went through without pay at the other end.

But since then Uncle Sam never delivered any considerable body of mail free up to the time of the San Francisco earthquake. It measures the extent of this calamity, the confusion into which a great city was thrown, that the post office should have cut its red tape in this particular. No regulations covered the matter; it was a plain case of horse sense on the part of Postmaster Fiske and his assistants.

The heads of the branch post offices in New York were puzzled to know whether to deliver these letters without payment or whether to exact the ordinary two cents an ounce as in the case of the soldier letters. In most cases they let San Francisco letters go free.

PRICELESS PAINTINGS.

Rare Relics of the War Discovered in Old Farmhouse in East Tennessee.

Knoxville, Tenn.—Two paintings, believed to be the work of two masters of Italian painting, have been discovered in an old farmhouse north of this city. One is by Guido Reni, who lived in the sixteenth century, and who is known by his painting, "The Aurora." The painting by him found near here is that of a beautiful upturned face, suggestive of adoration. The other, which bears every sign of being a masterpiece, is of the "Birth of Christ," but the author is not known.

The paintings were brought to the farmhouse in this county several years before the civil war by C. W. Ettig, who traveled for a supply house out of Baltimore. He was himself an artist, and decorated his room with valuable works of art. When the war broke out he left and told the owner of the house that he might keep the two paintings if he (Ettig) never called for them. He had previously placed one of them on exhibition at the Maryland institute, Baltimore, and the card shows that the painting was by Guido Reni.

Ettig never returned for his priceless paintings, and, forgotten, they have hung on the walls in the old farmhouse. They are now in the hands of Joseph Knaff, of this city.

HERD OF DEER AT LARGE.

Two Hundred of the Animals Running Wild Over Part of Tennessee.

Nashville, Tenn.—The famous Belle Meade herd of deer is now at liberty and the animals are running wild over the western end of the county. When Belle Meade was acquired by Judge J. M. Dickinson and others and plans were perfected to cut it up into small residence farms the high fence around the deer park was removed and the herd left to scatter.

In their wanderings the deer have paid no attention to fences or farm boundaries, but have taken short cuts through rich wheat fields and have investigated juicy corn patches, loud complaints from the farmers resulting. It is against the law to shoot deer in this county, and the only recourse the farmers have had is setting the dogs on the invaders. When chased by dogs the deer singly and in small droves have straightaway headed for their old haunts at Belle Meade as fast as their legs could carry them. The herd numbers 200 head.

No Ban on Babies.

A bill introduced by Representative Nye in the Ohio house of representatives makes it a crime for any tenement house owner to place a ban on babies. The bill provides that it shall be unlawful for a landlord or owner of any flat, apartment house or residence property to refuse to rent it on the ground of the possession of children by the applicant for a lease, provided that the number of children by the applicant for a lease, provided that the number of children shall not exceed four under 16 years of age.

Paid on Merit.

Hereafter in the public schools of Lynchburg, Va., the increase of teachers' salaries is to depend on efficiency. This is to be ascertained by having the superintendent and supervising principals report on the work of the teachers as to six points: discipline, knowledge of subject, method and manner, moral influence, professional interest and health.

THE MORNING EAGLE

Entered at the Postoffice as second class mail matter.

BY CARNES & WALLACE.

BRYAN, TEXAS, SEPTEMBER 20

MILNER'S APPEAL TO COTTON PRODUCERS.

From The Houston Post.

The cotton farmers, merchants and bankers of Texas ought to seriously consider the appeal of Hon. Robert T. Milner, president of the Texas division of the Southern Cotton association, to hold cotton for 10 cents a pound. According to all trustworthy information on the subject that is available, there is no reason why cotton should sell for less than 10 cents a pound. It has been pretty well ascertained that the crop is below the normal requirements of the world and the indications are that the volume of the crop will be still further reduced in what remains of the growing season.

The present bear movement has been well organized and will be sustained unless there is hearty co-operation between the farmers, merchants and bankers. Happily, such co-operation is more feasible now than ever before. Thousands of the farmers are independent and are not compelled to market the new crop at present prices, but surely those who for any reason are compelled to have money may be accommodated at reasonable rates of interest by the banks. At least many of them can surely obtain such accommodations.

We have these conditions at the beginning of every season and it is by surrendering to the bears at the beginning that the great majority of the producers are deprived of their just profits. It is invariably the case that when the bears control the bulk of the crop under such conditions that now exist that prices soar when it is too late for the producers to share in the advances that ensue.

The Post is not prepared to say that those who predict 12-cent cotton are sound in their conclusions.

OVER HASWELL'S BOOK STORE

THE MARKETS.

Special to The Eagle.

Stock Yards, Kansas City, Mo., Sept. 17, 1906.—Quarantine supply last week was moderate at 217 head and the market very good on all kinds. Steers averaged better quality than usual, and fair to good steers advanced 10 to 15 cents during the week. Top was \$4.00, and numerous lots sold at \$3.60 to \$3.85, and fewer cattle below \$3.00 than usual, in fact very few sales below \$3.10. Cows held about steady, top \$2.75, veals 25 to 50 higher. The run today is liberal at 130 car loads, but the trade was in good shape to take care of them, having cleaned up close last week on all kinds, both native and quarantines. Some 1000 lbs Osage nation steers sold at \$3.70 today, regarded as fully steady cows brought \$2.20 to \$2.75, some heifers at \$2.70, also called steady, calves firm, top \$6.25, heavy calves \$3.50 to \$4.50. In the native division demand for stockers and feeders has been very good lately, movement 750 car loads last week, heaviest of the season; they are selling strong today. Grass killing steers made a small gain last week, closing strong, while medium fed steers broke 10 to 20 cents, account of lower advices from the East. The grassers are killing out very good now, and there is also competition from feeder buyers on a good many suitable for killing. Prospects favor a large run balance of this week, market likely to rule weaker.

Hogs have been scarce, and prices are stronger, market up 5 cents today, light weights \$6.25 to \$6.43, mixed weights \$6.15 to \$6.35, heavy hogs \$6.00 to \$6.25. Supply last week was only 30,000 head, run today 4,000. Present prices are \$1.00 higher than at this time last year, and the demand much stronger now than then. More mixed hogs are coming and a greater variety of weights in each load, indicating close marketing and pointing to higher prices.

J. A. Rickart,
L. S. Correspondent.

HARVEY.

We are having fine weather for cotton picking now and the farmers seem to be taking advantage of it. Our gins are kept very busy, while the roads to the market are alive with the fleecy production. We are convinced more and more that this is the most prosperous part of Brazos county and we know her thriftiest people live here.

Sunday school was very well attended Sunday afternoon, after which the young folks spent a few hours in singing.

We are glad to note the recovery of Mrs. Woods, who has been quite sick for the past week.

Miss Leila Yardley, with a party from Reliance went to Galveston Saturday night to return Monday. Messrs. Treeman and Yardley

feel honored that they are to serve this week on the jury.

Harvey community now boasts of the record breaker in jumping. Mr. Cotnam is reported to have jumped some sixty five feet from his wagon in the wreck that was reported in last week's Eagle. We feel sure that no athlete will challenge a contest.

As reported school opened at this place on Sept. 10 with good attendance. Reub McDonald and Miss Ollie Corgie from Edge enrolled. Prof. McDonald has said many encouraging things with reference to his pupils. Many of the boys and girls were very careless in their books last term are working hard to advance themselves. They are pushing to the front and if their ambition grows with their work and we feel sure it will, intellectual advancement will soon be their one aim. As an inferior incentive to thorough work Mrs. McDonald has offered a gold medal to the student whose monthly average is 95 per cent in deportment and if the average is above the highest will win. Cor.

My fall stock of watches and jewelry is now in, bought at right prices for cash, and remember that McKenzie's Special Sale is on and will stay on without limit. Compare prices. 245

LITTEAUR DECLINES.

Congressman Refuses to Accept Republican Renomination.

Gloversville, N. Y., Sept. 19.—In a formal statement issued to the press Lucius V. Litteaur, representative in congress, declined to accept the re-

REPRESENTATIVE LUCIUS V. LITTEAUR, nomination from the Republican party in the new Thirty-second congressional district. President Roosevelt had a conference with Congressman Litteaur at Oyster Bay last week.

TWO KNOWN DEAD.

May Be Several Days Before Full Facts Are Obtained.

Dover, Okla., Sept. 19.—At daylight Wednesday at the scene of the Rock Island wreck at Cimarron river there were no more definite facts concerning the casualties than those given out previously. Up to Wednesday morning the known dead numbered two. While a number of persons were still missing it is believed many will be heard from soon. Two of the sixteen known injured may die. Searchers with torches worked all night to recover any possible victims that might still be in the submerged cars. Early Wednesday search was renewed, while for a distance of twenty miles down the stream parties were on the look-out for victims. It was known several of those who escaped from the wreckage drifted down with the swift current, some of them having been seen as far as Dover. It is not believed the exact number of dead will be known for several days yet.

FIREMAN FOUND.

Engineer and Two Brakemen Still Missing on Wednesday.

Lawton, Sept. 19.—A dispatch from Okeene states that the fireman on the Frisco freight train, which fell into the South Canadian river there, was found eight miles south of the bridge. He is seriously injured. The conductor was rescued from debris a few rods below the wreck of the bridge. The engineer and two brakemen have not been found yet. It is believed they were killed in the wreck and the bodies have floated away with the debris or been lost in the sand. Wrecking crews are engaged getting the wreckage out of the river.

A few Lawton people are supposed to have been lost in the wreck near Dover, among them two traveling men who make their headquarters here.

The Frisco dispatcher's office on this division reports tracks safe and the Canadian crossing not dangerous.

The dead are H. L. Littlefield of Pittsburg, Pa., and the three-year-old son of Mrs. Zells of Payne, O. Gammon, a mail clerk, residing at Fort Worth, is missing. Frank Cullen of Detroit floated down the stream three miles. He says he is sure seven corpses were seen in the river. Mail Clerk Owenton floated seven miles.

EMPLOY ELEPHANTS.

Twenty-Six Animals Engaged in Erecting a Pontoon Bridge.

Dallas, Sept. 19.—S. J. Tucker, agent for the Rock Island at Dallas, received a message from the general offices at Fort Worth to the effect that twenty-six elephants of a circus were unloaded at the scene of the Rock Island wreck and are being used to assist in making a pontoon bridge. The circus was caught north of the river and wanted to get across to make southern dates.

Eight-Hour Law Extended.

Oyster Bay, Sept. 19.—President Roosevelt has extended the eight-hour law to apply to all public work under the supervision of any department of the government. The order affects more particularly river and harbor improvements.

On Investigating Tour.

Denton, Sept. 19.—Hon. J. P. Hollis, special agent of the bureau of corporations, is here from Washington. He is the government official who sprang the packing house scandal. He will make a tour of the state investigating corporations.

All For Hearst.

Buffalo, Sept. 19.—There was no opposition in the Erie county Democratic primaries to W. R. Hearst for governor, and the delegation, including Buffalo, will be instructed for him.

Looks For Revolution.

PRIMARY RESULTS.

Parsons Faction Wins and Murphy Is Barely Successful.

New York, Sept. 19.—In the bitter clash of opposing factions in Tuesday's primary elections in New York county Congressman Herbert Parsons, president of the New York county committee, won a sweeping victory for the control of the Republican organization, while the leader, Charles F. Murphy, of Tammany Hall, retained his post at the head of the organization by a narrow margin. The Parsons victory in the Republican party was a complete rout for the faction led by State Chairman B. B. Odell, Jr., and L. E. Quigg. Mr. Parsons had the backing of President Roosevelt and Governor Higgins. He telephoned the president at Oyster Bay telling him of the victory and received Mr. Roosevelt's warmest congratulations.

The friends of Mayor McClellan had banded together to wrest the control of Tammany Hall from Murphy, and were very nearly successful in doing so.

While Murphy is accredited with a victory on the face of the returns, some of the leaders recorded as Murphy men are not pronounced in their affiliation, and may swing the result around when the test really comes in the county convention.

Mr. Murphy has been regarded of late as friendly to the nomination of W. R. Hearst for governor. If he can control the Tammany convention he may obtain a unit rule and throw all the Tammany votes to Mr. Hearst in the Buffalo convention next Tuesday. Mayor McClellan, who has been fighting Murphy for the Tammany control, has been outspoken as an advocate of the nomination of District Attorney Jerome for governor by the Democrats.

In Kings county (Brooklyn) Senator Patrick H. McCarron retained control of the Democratic organization.

Timothy Woodruff, formerly lieutenant governor, and friend of Governor Higgins, won out for the Republican control in Kings county against Michael J. Brady. Mr. Woodruff also had the support of President Roosevelt.

REPLIED TO SHAW.

Secretary of Treasury Termed "Prince of Standpatters."

Winston-Salem, N. C., Sept. 19.—For an hour and a half W. J. Bryan Tuesday addressed thousands of people here. Mr. Bryan devoted most of his speech to an answer to Secretary Shaw's speech on the tariff at Salisbury last week. He styled this member of the president's cabinet the "prince of Standpatters." Mr. Bryan said that the arguments given by Secretary Shaw were second hand garments cast off by his own party. Ten thousand people greeted Mr. Bryan at Salisbury in the afternoon, while he spoke.

FLOYD NOMINATED.

Victorious in Hardest Contest Ever Held in New Hampshire.

Concord, Sept. 19.—Charles M. Floyd of Manchester was nominated for governor Tuesday night at the close of the hardest contest ever waged in a Republican contest in New Hampshire. Nine ballots were necessary before the close was announced, and three of these ballots were made void by more votes being cast than there were delegates entitled to seats. Winston Churchill, the leader of the recently organized Lincoln Republican club of New Hampshire, was Floyd's closest competitor.

KICKED TO DEATH.

Young Lady Meets Tragic Fate Caused by a Horse.

San Marcos, Tex., Sept. 19.—While returning from a party Miss Laura England was thrown from a buggy and instantly killed by being kicked in the head by the horse. Two others were in the buggy and were only slightly hurt. She was the daughter of D. P. England. The accident happened fifteen miles north of San Marcos, near Wimberly.

When Bernhardt Was Fooled.

Sarah Bernhardt once fell victim to a sudden attack of homesickness while she was traveling in eastern Europe. She announced that she was going back to Paris immediately. Bucharest was the next city on the route and Bernhardt's impresario at once sent the following telegram to his advance agent, who was then in the Roumanian capital: "Wire me immediately as follows: 'Nobility and leaders society preparing magnificent reception. Minister of fine arts will be represented station. Torch-light procession, massed bands. Wire exact hour arrival.'" This telegram was duly sent and the impresario showed it to the actress, who forgot her homesickness in view of the magnificent reception awaiting her. When they arrived there were sixty solemn gentlemen in evening dress, with many decorations, on the platform, there were torches, flags and flowers, massed bands played the "Marseillaise" and the triumphal procession started for the hotel. "Are you not coming with us?" said the impresario to his advance agent, who showed signs of remaining at the station instead of going to the hotel. "No," he said. "I must look after the nobility and leaders of society. I am afraid they will bolt with their dress clothes." But the actress, so the story goes, never guessed that the sixty great men at the station were supers hired by the advance agent at 36 cents a head.

Life Saving at Fires.

If lives are in danger at a fire it is a universal rule that life saving takes precedence over fire fighting. If fire escapes are lacking or seriously obstructed all hands devote their entire energies to the work of rescuing by raising ladders, by forcing a passage through smoke filled hallways or by other emergency means. Life nets are spread and held ready for those who have not the nerve to wait for their rescuers. Life saving consumes valuable time which could be applied to advantage in fighting the flames, and the probable necessity for expending this time, governed as it is by many considerations, plays an important part in studies of underwriters. Occasionally pomper ladders or window scaling ladders are used in emergencies for making rescues. These furnish thrilling incidents for the newspapers, but are less efficient, slower and a great deal more dangerous both to the firemen and the rescued than the plain or extension ladders.—Insurance Engineering.

He Obeyed Orders.

Sir Henry Roscoe tells this of the scientist Faraday and his assistant, Sergeant Anderson: "Anderson was the sole assistant to Faraday and of course was utterly uneducated in scientific matters, but he could obey orders, which is not always a characteristic of an educated man. One day Anderson was told by Faraday to stir a pot containing some chemicals over a fire until he returned, Faraday being in the habit of going upstairs to tea in his rooms and coming down directly afterward to work in the laboratory during the evening. For some reason he was prevented from coming down again and forgot that he had told Anderson to watch the pot. On coming down the next morning he found Anderson still stirring the pot, having been at it the whole night and thus carrying out the order which was given him."

The Perverse Golf Ball.

A collector of evidence on the subject maintains learnedly that the golf ball is the most perverse of human institutions. Here is a list of strange lies noted by a follower of the ancient game: In another player's pocket, where it had dropped after travelling 200 yards; in a cow's mouth; on the roof of a clubhouse; behind the glass protecting a painting hanging on a cottage wall; in a clump of daisies, which it so resembled that it was not found for an hour. When it fell in the cow's mouth the frightened animal galloped 276 yards nearer the hole and then restored the ball to its owner. He promptly claimed to have driven it 397 yards and the right to play it from where it lay.

An Ancient English Workhouse.

In the records of St. Thomas hospital, London, is an entry of the year 1570 to the effect that "in consideration of the hote tynde of the yere" the poor be allowed "every one a day three pynnts of Bere for two months," a quart at dinner and a pint at supper, and at the end of two months return to "there olde ordinary allowance, wyche is one quarte." The food at this ancient workhouse was to be dealt with as liberally as the drink. The almoner and steward were to "bye no byffe but of the best, without bones and in speciall without the marybon, and none other to be bowght."

Professional Dignity.

"What wages do you expect?" asked Mrs. Randolph of Aunt Phronie, who had come to hire as cook.

"Well, Ah tell you. Ef Ah cooks an' waits on de table, too, Ah 'spects \$2 ebery week Ah lives, b-u-t ef yo' all has family reach at de table an' Ah 'spects 'hab ter cook, den Ah charges er dollar an' fo' bits."—Pittsburg Dispatch.

This Is Different.

"Love makes the world go round." The world seems to go round, but love makes your head swim. That's the explanation.

How to Be Beautiful.

"What do you do to keep so beautiful?" they asked the butterfly.

"I? I do nothing," she replied. A deep, genuine sincerity is the first characteristic of all men in any way heroic.—Carlyle.
